

2015 Freight Update

(Or what you should know about shipping cost)

As many of you are already aware, UPS and FedEx have made a dramatic change to the way they charge for shipping beginning in January 2015. In addition to their 2015 rate increase (approx 5%), they are now factoring in the size of the package (dimensional weight - DIM) and basing the price on how much space it takes on their trucks. Some of you have already noticed these increases in 2015 on your invoices. Perhaps you experienced these higher shipping costs when you ordered an agitator for a washer or a freezer door gasket.

The chart below gives some actual examples of 2014 versus 2015 shipping costs. You can be assured that All Brand is doing it's best to keep these costs down by consolidating orders when possible and using the smallest shipping box possible.

Description	Length	Width	Height	Actual Weight	Dim Weight	2014 Cost to Ship	2015 Cost to Ship	% increase
Pump / Motor	16	14	10	6	13.5	\$ 7.48	\$ 10.03	34%
Agitator	18	14	14	3	21.3	\$ 6.95	\$ 11.19	61%
Dryer Bearing Kit	21	15	4	1	7.6	\$ 6.24	\$ 8.56	37%
Door Gasket	31	20	2	2	7.5	\$ 6.54	\$ 8.56	31%
Large Ref Gasket	43	30	2	4	15.5	\$ 7.11	\$ 10.20	43%
